

Akanksha Dongre

CYBERSECURITY ENTHUSIAST | NETWORK ANALYST | SOC ASPIRANT

SECURE TODAY, SAFER TOMORROW

dongreakanksha123@gmail.com | linkedin.com/in/akanksha-dongre-865274365 | India

SKILLS

Core Security Concepts

- Security Operations (SOC)
- Network Monitoring & Analysis
- Log Analysis
- Threat Detection
- Incident Response
- Vulnerability Assessment
- Risk Analysis
- Digital Forensics (Basics)

Networking & Systems

- TCP/IP
- DNS
- Routing & Switching
- Windows / Linux (Basics)
- Firewall & IDS/IPS (Basics)

Tools & Technologies

- Wireshark
- Burp Suite
- OWASP ZAP
- Kali Linux
- Nmap
- Metasploit (Basics)
- Splunk (Basics)
- Elastic (Basics)
- Git & GitHub

LANGUAGES

- English (Professional)
- Hindi / Urdu (Fluent)

EDUCATION

Bachelor of Engineering (B.E.) Electronics and Communication Engineering

S.B. Institute of Technology, Bangalore

Graduated: 2025

PROFESSIONAL SUMMARY

Motivated and detail-oriented recent engineering graduate with a strong foundation in cybersecurity and network operations. Passionate about threat detection, log analysis, and system security. Eager to contribute to a SOC team and grow in the field of cybersecurity through hands-on experience, continuous learning, and real-world challenges. Quick to adapt, analytical in problem-solving, and committed to building a secure digital future.

TECHNICAL SKILLS

Core Security Concepts	:	Incident Response, Alert Triage, Log Analysis, Threat Detection, Security Monitoring, Risk Assessment
Security & Network Tools	:	Wireshark, Nmap, Burp Suite, OWASP ZAP, Kali Linux
Networking Fundamentals	:	TCP/IP, DNS, HTTP/HTTPS, Routing & Switching
Operating Systems	:	Windows, Linux (Basics)

WORK EXPERIENCE

Cyber Security Intern — *Sept 2025 – Dec 2025 (Remote)*

Infotol Solutions

- Completed hands-on training and worked on Snort-based Network Intrusion Detection Systems (NIDS).
- Performed basic alert analysis, log monitoring, and rule understanding to identify potential security threats.
- Gained practical exposure through hands-on projects, incident response workflows, and security operations fundamentals.

PROJECTS & SIMULATIONS

Network Intrusion Detection & Packet Analysis

- Configured and tested Snort rules to monitor simulated network traffic and capture unauthorized access alerts.
- Performed deep packet inspection and analyzed traffic anomalies using Wireshark to isolate potential threat vectors.

Hackamp SIEM & SOC Challenge

- Participated in live SOC simulations, practicing alert triage, log investigation, and incident response playbooks.
- Secured Rank #28 globally.

CERTIFICATIONS & VIRTUAL EXPERIENCE

- **Google Cybersecurity Professional Certificate** – Google
- **SOC Fundamentals & SIEM 101** – LetsDefend
- **Cybersecurity Job Simulations (Deloitte & Tata)** – Forage
- **IBM Cybersecurity Fundamentals Certificate** – IBM
- **Google AI Essentials & Foundations of Cybersecurity** – Google

EDUCATION

Bachelor of Engineering (B.E.) in Electronics and Communication Engineering

S.B. Institute of Technology, Bangalore — *Graduated: 2025*
